

Where the money comes from

Year 1 hypothesis: who buys, how many, and what we keep after AssemblyAI is paid

modelled, not signed

Year 1 by tier

bar length = revenue; the solid part is what we keep

Year 1 total

\$78,000

revenue

\$51,576

gross profit · 66% margin

THE HYPOTHESIS

- 1 question = 3 billed session-min = \$0.22
- Bootcamp: 30 learners, 4 intakes a year
- Campus: 500 seats, 60% of them active
- Pro: 2.5% of free sign-ups convert
- Free: 15% of sign-ups active each month

Costs verified against live AssemblyAI pricing.
Prices and buyer counts are modelled.

If the hypothesis holds

buyers won, and gross profit kept, over three years

YEAR 1

\$51,576

gross profit on \$78,000 revenue
10 bootcamps · 2 departments · 50 Pro

YEAR 2

\$177,168

gross profit on \$282,000 revenue
30 bootcamps · 8 departments · 200 Pro

YEAR 3

\$468,756

gross profit on \$774,000 revenue
60 bootcamps · 25 departments · 600 Pro
